Any project inquiries should be in writing and directed to the Project Manager at:

Jeff Massie, Project Manager
Seattle Public Utilities
PO BOX 34018
Seattle, WA 98124-4018

e-Mail: Jeff.Massie@seattle.gov
Phone: (206) 684-0976

Background

This project is an EPA-required action as part of the cleanup of the Terminal 117 Early Action Area in the Lower Duwamish Waterway (LDW) Superfund Site. This project is being done in partnership with Seattle City Light.

Project Scope

The project entails remediation of PCB contaminated soils within the street right-of-way as shown above. Street restoration, the installation of a new stormwater collection, treatment, and infiltration system, and Duwamish Waterway stormwater outfall are other elements of the project. The approximate construction cost of the overall project is \$6 – 8 million
